2009 Financial Year Results Update

Ramsay Health Care Limited (“Ramsay”) advises that barring unforeseen circumstances, the core EPS growth of the Group for the 2009 financial year is likely to be approximately 20%.

At Ramsay’s half year results announcement on 26 February 2009, Ramsay advised that core EPS growth would likely be in excess of the company’s original guidance of 10% to 12% as a result of the low interest rate environment. This low interest rate environment has continued into the second half of the 2009 financial year and Ramsay is now in a position to assess the impact of lower interest rates on the full year results with a greater degree of certainty.

Ramsay’s operating business remains strong and continues to perform in line with expectations.
