¹ The source of energy is procured only, no on-site generation included.
² Anaesthetic gases include isoflurane, desflurane, sevoflurane, nitrous oxide and entonox (50% nitrous oxide and oxygen). Ramsay Santé data excludes nitrous oxide and entonox.
³ All electricity in Ramsay UK (Acute and Elysium) is 100% renewable, meaning there are no emissions associated with usage.
⁴ The emission loss factor for electricity usage is included for some sites in Australia.

NOTE
 Figures for France are for the period April 2022 - March 2023. Data excludes Italy. Elysium FY22 data covers Feb-Jun 2022. FY22 for the Nordics has been restated due to improved data. IPDA is In-patient days and day-only patient admissions. Ramsay Santé intensity figures have been restated due to change in IPDA definition. The figures in the Environment Scorecard for Ramsay Australia, Ramsay UK, Elysium Healthcare and Ramsay Sime Darby are subject to limited assurance, see page 56 for details.
